

# Shared Measurement System Framework

One of the five conditions of Collective Impact is establishment of a Shared Measurement System (SMS). A SMS helps track collective progress on shared goals and priorities and supports continuous learning and accountability among partners.

The graphic to the right is a high level view of the Network’s Shared Measurement System Framework. This framework was developed by network partners based on input and feedback received from community members. It clarifies shared goals, helps organize partners around shared priorities for greater impact, guides strategy design, and creates accountability for change.

A cross-sector workgroup of partners supports the development and maintenance of Jackson’s Shared Measurement System. SMS goals, leading indicators, and metrics are adjusted over time, as results are achieved, as community needs and priorities shift, or as available data sources change.

# VISION: A Healthy, Safe, Thriving Community

	ROOT CAUSE PRIORITIES/SYSTEMS CHANGE TARGETS	LEADING INDICATORS	GOALS	AIMS
Equity	Services and policies are equitable and benefit the most vulnerable populations	Confirmed shootings Sexual abuse Child/elder abuse rates Intimate partner/domestic violence	Reduce rate of violent crime in Jackson County	We are safe
	Priorities of upper/middle-class policy makers and service providers reflect understanding of community members' immediate needs and barriers	Resident perception of safety in their homes Resident perception of neighborhood safety Resident perception of safe routes to school	Increase % of residents with positive perception of safety	
	Providers, organizations and community members acknowledge bias and treat everyone in a respectful, equitable manner	Infant Mortality Suicide rates Drug-related deaths Deaths by unintentional injury	Decrease years of potential life lost	We are healthy
	Community members are adequately involved in design and administration of policies and services	Residents reporting poor physical health Residents reporting poor mental health Residents reporting activity limited due to poor physical/mental health	Increase % of residents with positive self-reported health status	
	Improved trust between community members and service providers	Participation in early childhood experience Quality of early childhood settings	Increase % of kids demonstrating readiness for kindergarten	
Authentic Engagement	Organizations and providers effectively communicate with community members	Grade level proficiency in English Language Arts, Math Student meeting/exceeding state SAT benchmarks	Increase % of adults with valuable credential	We achieve our full potential
	Community members have skills/assets and agency to get their needs met	Educational Attainment (high school grad, valuable cred, early middle/college) Living wage employment Unemployment rate Incarceration rates	Reduce % of families living in poverty	
	Community members' social networks, relationships and environment meet their needs for social support	Teen pregnancy rates Youth that report making suicide plans Youth that report experiencing 2 or more ACEs	Increase youth protective factors	
	Community members and providers are knowledgeable about service systems	Resident perception of housing affordability Resident perception of the quality of their housing # affordable housing units	Increase availability of affordable housing	We are resilient
	Community-based services are sufficient to help residents meet their basic needs	Residents perception of availability of affordable food Residents reporting feeling worried or stressed about ability to purchase food	Reduce rates of food insecurity	
Continuous Learning	Existing services are affordable to community members that need them	Residents with healthcare coverage Average number of ED visits per resident/year Residents reporting care meets their needs	Increase % reporting access to quality health care	Our basic needs are met
	Service systems are easier to navigate			
	Organizations, providers and community systems effectively communicate with each other			
	Service providers deliver evidence-based services
